

YOLO Object Detection Results

RESULTS FOR DARK IMAGES →

1.

The screenshot shows the YOLO Detection web interface in a browser window. The title is "YOLO Detection – Overall & Object-wise Performance". A "Confidence Threshold" slider is set to 0.25. Below this is an "Upload an image" section with a "Drag and drop file here" area and a "Browse files" button. A file named "D1-1.jpg" (3.7KB) is uploaded. The "Overall Image-level Performance" section displays three metrics: "Total Objects Detected" is 1, "Overall Inference Time (ms)" is 5051.3, and "Confidence Threshold" is 0.25. The "Detection Result (Visual Accuracy)" section shows a dark image with a yellow bounding box around a bicycle and the label "bicycle 0.91". The browser's address bar shows "localhost:8501". The Windows taskbar at the bottom shows the date and time as 17:56 on 03-01-2026.

Overall Image-level Performance		
Total Objects Detected	Overall Inference Time (ms)	Confidence Threshold
1	5051.3	0.25

Detection Result (Visual Accuracy)

bicycle 0.91

Streamlit interface showing a video frame and an "Object-wise Performance Summary" table.
